

| investment process optimization |

Industry leading AI powered analytics  
and data management

Save implementation time and cost through  
**rapid deployment**

Streamline and automate investment processes with  
**unparalleled flexibility**

Make better and timely investment decisions with  
**robust analytics**

Opturo's mission is to deliver industry leading technology solutions to our clients to optimize their investment processes.

We combine AI integrated data management, accurate analytics, and flexible architecture to provide clients with the tools and infrastructure they require to facilitate efficient and scalable growth.

## Opturo Provides:

- Performance & Attribution, Ex-post and Ex-ante Risk Analysis, Composite Management and other Analytical tools
- Automation of Front/Middle/Back-office Investment Processes
- Integrated advanced AI technologies into our solutions to deliver intelligent automation, predictive insights, and enhanced decision-making

## Opturo's Advantages:

- Accurate and economically meaningful analytics
- A platform that adapts to each firm's needs, not the other way around
- Rapid support to provide solutions to critical analytics & data management problems
- Customization of reporting and other investment/data processes
- AI capabilities helping customers accelerate innovation, automate complex processes, unlock actionable insights, and make faster, smarter decisions.

Unique data visualization for in-depth analysis

User-defined custom decision tree

# OPTURO

## PERFORMANCE & ATTRIBUTION

# decision through analysis

Opturo offers a range of enterprise-level front-office investment solutions.

**Opturo Performance & Attribution** is an industry leading, AI integrated, comprehensive, low latency, in-house solution specifically geared towards improving the content obtained from, while reducing the cost of, analyzing portfolio performance. It has the design flexibility to properly analyze each portfolio's own custom investment process, providing reliable and appropriate information to both the firm and its clients.

### HIGHLIGHTS

- ▶ **Exact Performance:** Built upon daily, component-level, trade-inclusive, multi-currency returns for both longs and shorts, and notional products. Incorporates corporate actions, overnight cash flows and tax reclaim to provide accurate weights and returns for performance reporting and attribution while resolving notorious difficulties arising from intra-day transactions.
- ▶ **Exact Attribution:** Performance Attribution & Decision Risk Attribution that accurately differentiates the effects of controllable investment decisions from the effects imposed by the market.
- ▶ **Custom Decision Trees:** Allows the user to designate, on-the-fly, the structure of the decision process that will be employed in the attribution analysis of each fund, such as applying different investment decisions to equities than to fixed income assets within a unified evaluation of the effects of each of a fund's decisions on its performance and risks.
- ▶ **Improved Calculations:** Performance and attribution terms are carefully made economically meaningful, avoiding the all-too-common critical calculation problems endemic in popular competing platforms.
- ▶ **Rapid Deployment:** Opturo's proprietary plug & play technology offers a quick and cost effective implementation.

# THE OPTURO ADVANTAGE

**Exact and Meaningful:** Every performance and attribution term calculated is the precise answer to a clear financial question.

## Follow-The-Money Performance

- **Daily & Trade-inclusive:** Correctly calculates the component-level returns for any possible transaction combination of sales, purchases, flips and shorts.
- **Sign-Appropriate:** The return for every instrument has the same sign as its gain and is never below -100%.
- **Resolves problems** endemic in all popular daily, component-level, trade-inclusive alternatives such as in all versions of modified Dietz and IRR.

## Decision Performance & Risk Attribution

- **Daily & Multi-period** of any specified length with option to employ real-time up-to-the-moment data.
- **Trade-inclusive.**
- **Custom on-the fly,** user-specified decision tree. Evaluates all and only your actual investment decisions as you deploy them, matching attribution to your actual investment process.
- **Roll-Ups** to portfolio and period-level are always perfectly correct.
- **Multi-Currency** with hedging.
- **Multi-Asset:** Mutually consistent equity, fixed income and balanced-fund decision analysis.
- **Long/Short:** Market neutral, 130/30, etc.

Avoids problems such as the all-too-common Interaction Terms, and the technical smoothing of temporal compounding that deprives attributes of their intended economic meaning, since Opturo's decision analysis strictly employs only precise effects of actual investment decisions.

### Executive summary

| Metric            | Value |
|-------------------|-------|
| Cumulative Return | 10.1% |
| Annualized Return | 1.0%  |
| Volatility        | 1.5%  |
| Sharpe Ratio      | 0.67  |
| Beta              | 1.00  |

## Advanced Technical Features

- **Time-Series Data Visualization.**
- **Look-through capability up to 10 levels deep.**
- **Custom Reporting:** To meet internal and client performance reporting requirements.
- **Advanced AI:** Intelligent automation, predictive insights, and AI-powered decision support.
- **Rapid Deployment:**
  - Leverages proprietary plug-and-play technology.
  - Quick and cost-effective implementation.

| Leaves execution ambiguous                                              | Validates and executes deterministically                                 |
| Competitors are limited to their own platform data                      | Can unify and analyze data across the enterprise                         |
| Competitor solutions are limited to pre-calculated, persisted analysis. | Broader answers from live enterprise data, beyond pre-calculated results |

# OPTURO BUSINESS INTELLIGENT DATA MANAGEMENT

Opturo has developed the most flexible, scalable, and comprehensive investment automation platform available in the marketplace.

A key advantage the platform provides is making efficient data management a top priority. This prioritization is reflected in the platform architecture, as the data management engine, ODIN Platform, is decoupled from the analytical tools such as Performance & Attribution. This enables end to end customization for clients, as the platform is:

**Rapidly implemented** – The Opturo platform can be implemented in days or weeks as opposed to the months

or years competing platforms require. The direct and indirect cost savings are typically dramatic. There is no such thing as a multi-year or failed implementation costing millions of dollars.

**Unparalleled Flexibility** – Custom business logic/rules can be easily configured to meet specific analytic and reporting requirements.

**Stateless** – No database is necessary or data structure imposed. Calculations and analytics can be done on-the-fly.

**Data source agnostic** – Opturo does not impose data formats, data structures, or data sources.

**End to end customization** – Opturo leverages the existing data environment and provides for customized analysis and reporting.

Opturo recognizes that efficient data management facilitates effective analytics

Opturo's transparency and open architecture allows users to build and automate investment processes
